SUMMARY

Software engineer and technical lead with experience designing and building REST APIs, applications from scratch, and microservices with gRPC and Docker. I currently lead the technical delivery of enterprise software at COEN, focusing on documentation, reproducible workflows, and responsible AI adoption. AWS Certified Cloud Practitioner.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Go, SQL
Backend	Node.js, REST APIs, gRPC, JWT, Hono, Drizzle, Zod
Frontend	React, React Native, Next.js, Expo, Astro
Databases	PostgreSQL, MySQL, MongoDB
Infrastructure	Docker, Docker Compose, AWS, NGINX, Linux (Ubuntu), GitHub Actions
Quality	Jest, Vitest, Playwright, SonarQube, Typedoc, Jenkins

EXPERIENCE

COEN

December 2025 — Present
Mexico

Technical Lead

- I lead the technical delivery of enterprise software, aligning technical decisions, documentation, and team practices.
- I defined comment formats and task documentation so every change includes the context needed to review, test, and maintain it.
- I implemented a branch workflow and Git conventions to keep the repository organized and make collaboration easier.
- I prepared scripts and the execution order for features and changes for the deployment owner, reducing ambiguous delivery steps.
- I guided the team in using Claude, sharing practices from my OpenCode workflow that they could adapt to their tools and processes.

CITI Value in Real Time

September 2025 — January 2026
Mexico

Software Engineer

- I implemented features on a Next.js web platform and a React Native mobile app, using TypeScript across both projects.
- I wrote unit tests for every feature, reaching over 80% coverage on new code.
- I ran static analysis with SonarQube and added test suites to Node.js microservices that lacked them.
- I worked across teams and delivered features within the agreed deadlines.

TypeScript · JavaScript · Node.js · React · React Native · Next.js · PostgreSQL · Docker · SonarQube

NGX Networks

February 2025 — May 2025
Mexico

Software Engineer

- I built a web application with React, TypeScript, and Node.js to monitor private servers, reducing downtime and improving incident detection.
- I built a cross-platform mobile app with React, Expo, and TypeScript, collaborating with the design team.
- I created an NGINX reverse proxy between the mobile app and the ticketing API, simplifying client communication.

TypeScript · Node.js · React · Expo · Docker · NGINX

Under Apps Systems

September 2023 — October 2024
Mexico

Software Engineer

- I maintained and fixed bugs across four microservices: three with Node.js/Express and one with Java/Spring Boot.
- I built Node.js endpoints in JavaScript and TypeScript, and designed and implemented PostgreSQL schemas.
- I containerized applications, implemented an NGINX reverse proxy, and wrote unit tests with Jest.
- I documented projects with Typedoc and automated processes with Bash scripts and `package.json`.

JavaScript · TypeScript · Node.js · PostgreSQL · MongoDB · Docker · NGINX

SELECTED PROJECTS

Cestia

A production app for personal and shared purchases. Go backend, React and TypeScript interface, PostgreSQL, and idempotency for purchases and corrections.

NeuraClinic

A production clinical SaaS. Clinical and administrative frontend, gRPC contracts, file management, and exports.

EDUCATION

Universidad Tecnológica de Nogales

2021 — 2025
Mexico

Engineer in Software Development and Management

- First place in academic achievement.
- Presented a poster at COMIA, an artificial intelligence event, and shared it with other schools.

CECyTES

2018 — 2021
Mexico

Programming Technician

CERTIFICATIONS

AWS Certified Cloud Practitioner
